Innovision Cosmochem Solutions

Enriching Lives with Innovative Chemistry

Innovision Cosmochem solutions (ICS) is an Importer, Exporter and Distributor of specialty chemicals to the Personal Care, Home Care, Pharma and Food industry. We offer a wide range of ingredients from renowned manufactures that deliver ease-of use, quality and efficacy to our customer's products. For ICS, the business goes far beyond the sheer distribution of chemicals. We....

- connects chemical manufactures and chemical users in a value-adding partnership
- serves as one stop solution to the customer's need
- supports with technical knowledge and formulation guidelines
- supports customers and manufacturer with distribution solution for specialty chemicals

SKIN LIGHTENING/ ANTI-PIGMENTATION ACTIVES

Product Name	PROPERTIES/ BENEFITS	SOLUBILITY	REC DOSAGE (%)	APPLICATIONS
Alpha Arbutin	Effective and stable natural skin lightening / whitening and depigmentation agent. Also prevents liver spots and freckles, treats sunburn marks & regulates Melanogenesis and inhibits melanin synthesis. Protects the skin from damages caused by free radicals.	Water	0.2-2.0	Creams, Lotions, Scrubs, Masks, Serums, Face Packs
Beta Arbutin	Blocks epidermal melanin biosynthesis by inhibiting enzymatic oxidation of Tyrosine and Dopa. Promotes skin lightening and an even skin tone on all skin types and also minimizes liver spots.	Water	1.0-7.0	Creams, Lotions, Scrubs, Masks, Serums, Face Packs
Kojic Acid	Inhibits tyrosinase activity and is cost effective skin lightener.	Water	0.5-5.0	Creams, Lotions, Scrubs, Masks, Serums, Face Packs
Kojic Acid Dipalmitate	It is more effective than Kojic Acid, excellent in even toning the skin, fighting age spots, pregnancy marks, freckles and general skin pigmentation disorders. It is stable within wide pH. range 3-10 and does not chelate with metal ions which lead to color change and instability.	Oil	0.5-5.0	Creams, Lotions, Scrubs, Masks, Serums, Face Packs
Ethyl Ascorbic Acid	It is the best currently-known derivative of vitamin C. It has a very stable chemical properties. It inhibits the activity of Tyrosinase, prevents the formation of Melanin, Resists inflammation caused by sunburn, Improves Skin's complexion, promotes the synthesis of collagen, enhance skin's elasticity.	Water	0.5-25.0	Creams, Lotions, Scrubs, Masks, Serums, Face Packs
Ascorbyl Palmitate	It is a highly bioavailable, fat soluble derivative of ascorbic acid. It possesses all the benefit of vitamin c. It is used as an antioxidant, skin lightening, anti-ageing in skin care applications.	Oil	0.2-5.0	Creams, Lotions, Scrubs, Masks, Serums, Face Packs
L- Glutathione Reduced	Glutathione is a tripeptide consisting of cysteine, glycine and glutamate and functions as a major Anti-oxidant. It has a skin whitening effects through its tyrosinase inhibitory activity.	Water	0.5-2.0	Creams, Lotions, Scrubs, Masks, Serums, Face Packs
Niacinamide	It is a form of Vitamin B3 used to prevent and treat niacin deficiency. It is vital nutrient for the skin. It will help in Hyper pigmentation, minimize lines and wrinkles, protects skin from infra light, Even skin tone, boots immunity of skin.	Water	0.1-2.0	Fairness Creams, Sunscreens, Moisturizers, Hair tonics, Bath products, Shampoos
Sodium Ascorbyl Phosphate (SAP)	Stabilized form of vitamin C that not degrade in aqueous formulas. Esterification of acid protects vitamin C oxidative degradation. Potent antioxidant (shown to be able to protect skin from oxidation damages) Can improve appearance of aged and fragile skin. Widely used as add-on ingredient in skin-lightening products to correct hyperpigmentation and age spots.	Water	0.2-3.0	Creams, Lotions, Scrubs, Masks, Serums, Face Packs
Magnesium Ascorbyl Phosphate (MAP)	It is a form of Vitamin C that is used in skin care products for its ability to protect the skin from free radicals, stimulate collagen production, reduce hyperpigmentation, and maintain skin hydration.	Water	0.2-3.0	Creams, Lotions, Scrubs, Masks, Serums, Face Packs

ANTI-AGEING / ANTI-WRINKLE ACTIVES

Beta Glucan	Beta glucan may help to reduce wrinkles and promote anti-aging. It has some antioxidant properties and is a skin-soothing agent. Beta-glucan is considered as an excellent ingredient for improving the look of redness and other signs of sensitive skin.	Water	0.5-3.0	Creams, Lotions, Serums, Masks
-------------	--	-------	---------	--------------------------------

Biosaccharide Gum 1	Long-lasting and strongly moisturizes skin, reduces fine lines and wrinkles. Forms bio-elastic membrane and quickly soothes skin. Improves the smoothness and softness of skin without increasing the viscosity of the product.	Water	0.5-5.0	Creams, Lotions, Serums, Masks
Ceramides 3B	Ceramides are used to replenish the natural lipids that are lost from exposure to harsh environmental factors, use of drying products, and during in the aging process. They restore moisture, fortify the skin's natural barrier and help protect it against harm from foreign elements. Ceramides are also particularly effective in treating eczema.	Oil	0.5-2.0	Creams, Lotions, Serums, Masks, Oils
Soy Isoflavones	Increases fat accumulation in breast, makes it become strong and firm again. It slows skin ageing and reduce fine lines.Improves moisture content and elasticity of skin. It can be used in Breast enhancer, anti-ageinmg, anti wrinkle products.	Oil	1.0-3.0	Creams, Lotions, Serums, Oils
MOISTURIZERS / EMOLLIENTS / SOOTHING ACTIVES				
Sodium PCA	Sodium PCA increase the water content of the top layers of the skin by drawing moisture from the surrounding air. They also enhance the appearance and feel of hair, by increasing hair body, suppleness, or sheen, or by improving the texture of hair that has been damaged physically or by chemical treatment.	Water	1.0-5.0	Creams, Lotions, Serums, Face Wash, Shampoo, Conditioners
Allantoin	Anti-inflammatory, keratolytic and moisturizing properties; It acts as a moisture barrier for the skin, increasing moisture retention. Allantoin relieves skin irritation which can arise from use of AHA's and some common surfactants. It is a very safe and effective skin protectent.	Water	0.2-2.0	Creams, Lotions, Serums, Face Wash, Shampoo, Conditioners
Betaines	A component of Natural Moisturizing Factor that naturally exist in organism tissues. A superior moisturizer with fresh hand feel and rapid skin permeability which brings skin and hair with moist feeling, inceases the smoothness of hair and protects hair damage caused by chemical treatments.	Water	1.0-5.0	Creams, Lotions, Serums, Face Wash, Shampoo, Conditioners
Hydroxyethyl Urea (HEU)	Rejuvenates and nourishes skin with vital nutrients. Acts as lubricant on the skin surface, which gives the skin a soft, smooth appearance. It helps to soothe irritating skin, gets readily absorbed into the skin because it resembles the natural oil produced by the body.	Water	1.0-5.0	Creams, Lotions, Serums, Face Wash, Shampoo, Conditioners
Sodium Hyaluronate	Non-animal origin bacterial fermentation, soften cuticle, enhances the absorption of nutrients, lock the water 1000 time of its own weight, eliminate free radical, prevents and repairs skin damage by granting elasticity & suppleness. With lower molecular weight HA (10kDa~1000kDa) has excellent hydration capacity & long lasting moisturisation. With higher molecular weight (1000), improves skin smoothness, elasticity and freshness, lubrication film forming, thickening & and preventing skin damage.	Water	0.1-1.0	Creams, Lotions, Serums, Masks
Sodium Hyaluronate (1%)		Water	0.1-10.0	
D - Panthenol	D Panthenol is a provitamin of vitamin B5. It is widely used as humectant, moisturizer and emollient in cosmetics and personal care products.	Water	0.2-5.0	Creams, Lotions, Serums,
Vegetable Squalane	Rejuvenates and nourishes skin with vital nutrients. Acts as lubricant on the skin surface, which given the skin soft, smooth appearance. It helps to soothe irritating skin gent readily absorbed into the skin because it resembles the natural oil produced by the body.	Oil	0.5-5.0	Creams, Lotions, Serums, Shampoos
THICKENERS / RHEOLOGY MODIFIERS				
Acrylates Copolymer	It acts as a rheology modifier and suspending agent. It is a lightly cross-linked acrylate copolymer. It provides exceptional clarity around neutral pH and desirable flow characteristics. It enhances earlization appearance to improve the visual impact of penalising additives in surfactant-based systems. It enhances pearlization appearance to improve the visual benefits through back-acid formulating.	Water	2.0-8.0	Face wash, Body Wash, Shampoos, Shower gel
Acrylates/ C10-30 Alkyl Acrylate Crosspolymer	It acts as s thickener, rheology modifier and suspending agent. It is a white powder, hydrophobically-modified cross-linked acrylate copolymer. It is easy-to-use as it self-wets and disperses within minutes. It provides improved swelling time, electrolyte tolerance, rich creams skin feel, exceptional clarity and unique sensory benefits in formulations.	Water	0.2- 1.0	Face wash, Body Wash, Shampoos, Shower gel, Creams, lotions, Hair Gels
Carbomer 940	It is an acrylic-based polymer in powder from. It is typically used to formulate transparent and thick gels. It is an optimized grade of Carbomer with better viscosity and high clarity.	Water	0.2- 1.0	Creams, Lotions, Serums, Gels, Hand Sanitizers

Carbomer 980	It is an acrylic-based polymer in powder form. It is typically used to formulate transparent gels. It is an optimized grade of Carbomer with better handling, clarity and less foam. It is used in hair care and skin care products, for gel, lotion and cream formulations.	Water	0.2- 1.0	Creams, Lotions, Shampoos, Gels
Xanthum Gum	It is a polysaccharide derived from the fermentation of carbohydrates. It is derived from glucose or corn syrup. It is used in a wide variety of cosmetics and personal care products.	Water	0.1- 1.0	Creams, Lotions, Shampoos, Gels
Hydroxy Ethyl-Cellulose (HEC)	It is a non-ionic, water soluble polymer used as a thickening agent for aqueous cosmetic and personal care formulations. It will produce crystal clear gel products and thicken the aqueous phase of cosmetic emulsions. It can also be used to efficiently thicken shampoos, body washes and shower gels.	Water	0.2- 2.0	Serum, Facewashes, Makeup, Soaps, Detergent, Shampoo, Hair conditioners, Deodorants, Oral Hygiene

RHEOLOGY MODIFIER FOR FABRIC SOFTENER / CONDITIONER

Resoft 909	It is cationic in nature, water insoluble, Rheology modifier for fabric conditioner and all cationic system. It has excellent dispersion and stability, water property. Easy to use, no neutralization required	Water	0.2- 1.0	Fabric conditioner
------------	---	-------	----------	--------------------

COLD PROCESSABLE POLYMERS / EMULSIFIERS

Repoly 315 (Polyacrylamide & C13-14 Isoparaffin & Laureth-7)	It swells fast and allows you to create gel or cream immediately without neutralization or heat, emulsifies all kind of oil, disperses pigment and physical sun screen, make the cream with soft, supple and shining textures.	Water	2.0-5.0	Cream , Creamy Gel , Make up foundation, Sun Screen cream, formulas containing polar / solvent /alcohol / Polyol, formulas containing silicone / AHA / Vegetable oil
Repoly 415 (Sodium Polyacrylate & C13-14 Isoparaffin & Laureth-7)	It swells fast and allows you to create gel or cream immediately without neutralization or heat. It can emulsify all kinds of oil and disperse pigment and physical sunscreen. It can be used over a wide range of pH and makes it possible to obtain soft, supple and shining textures.	Water	2.0-5.0	
Repoly 715 (Hydroxyethyl Acrylate / sodium Acryloyldimethyl Taurate Copolymer & C13-14 Isoparaffin & Laureth-7)	It is fresh and easy to melt skin feeling. The emulsifier with excellent safety and more extensive of usage scope should cause special concern of cosmetic formulators.	Water	2.0-5.0	
Repoly 915 (Polyquaternium-37 & Mineral oil & C11-15 Paraffin-7)	It is a liquid polymeric thickener. Its solution is pseudo-plasticity and non-thixotropy, and the structure of this gel is easily destroyed by shear force. When the force is gone, the structure returns quickly to the structure of this gel is in high stable o/w emulsions without considering the HLB value of the oil phase , as well applied in the thickening of cationic aqueous systems. It does not require heat and neutralization during the production process.	Water	2.0-5.0	Cream, Lotion, Shampoo, Hair conditioner

SURFACTANT BASE (SHAMPOO / FACEWASH / BODYWASH)

InnoCare SPSF 5000 (Sulphate Free Base for Shampoo / Facewash)	It is based on Mild and gentle cleansers and is Skin & Hair Friendly. Increases Moisture Retention, thus giving supple effect on hair & skin. Improves and retains natural oils. Reduces chances of developing irritation or inflammation within the scalp.	Water	1:1 Ratio	Shampoo for strain hair / color hair/ treated hair , Face wash for mild skin, Baby Shampoo / Baby wash gel.
--	---	-------	-----------	---

SULPHATE FREE SURFACTANTS

Coco Glucosides (APG)	Non-ionic natural eco-certified plant based surfactant. Very mild surfactant, foam booster, thickener in shampoos, face wash, body wash, shower gel. Can be used in baby care products	Water	3.0-20.0	Shampoos, Face Wash, Cleansers, Shower gel Bubble Bath, Body Wash, Soap Bars, Hand Wash
Decyl Glucosides (APG)		Water	3.0-20.0	
Lauryl Glucosides (APG)		Water	2.0-25.0	
Caprylic Capric Glucosides (APG)		Water	2.0-15.0	
Sodium Lauryl Sarcosinate	Extremely mild amino-acid surfactant. Give high foaming	Water	3.0-30.0	

CONDITIONING AGENTS				
D-Biotin	It stimulates keratin production in hair and can increase the rate of follicle growth It improves the texture of creams and adds body and shine to hair It has moisturizing and smoothing properties.	Water /Oil	0.1-0.5	Shampoos, Shower Gels, Conditioners, Hair Creams, Hair styling, Hair Tonics, Body wash, Skin Conditioners
Polyquaternium 7	It is a highly substantive aqueous cationic polymer for use in skin hair care formulations. It is readily soluble in water, compatible with anionic, amphoteric, cationic and nonionic surfactants, and imparts slip and lubricity to formulation,.	Water	0.5-3.0	
Polyquaternium 10	A water-soluble cationic polymer with good performances of thickening, colloid stability, antistatic ability, moisturization, lubrication.	Water	0.5-5.0	
Polyquaternium 22	A water-soluble cationic polymer with good comb ability, antistatic ability, moisturization, lubrication. Used in shampoo, Hair conditioner, Body wash, hand soap.	Water	0.5-5.0	
Polyquaternium 39	A water-soluble cationic polymer with good performances of thickening, colloid stability, antistatic ability, moisturization, lubrication.	Water	0.5-5.0	
Guar Hydroxypropyltrimonium chloride (GHTC)	A water-soluble cationic polymer with good combability, antistatic ability, moisturization, lubrication.	Water	0.1-0.5	
Hydrolyzed Keratin	It imparts gentle and glossy feel to hair because of its effective absorption and film-making properties. Excellent moisture binding properties, resulting in optimum conditioning and increased strength. improves elasticity and resiliency.	Water	0.5-5.0	
SCRUBBING AGENT / BODY POLISHING AGENT				
InnoSpheres (Cellulose Beads (Dispersible)-customized colors)	These are dry, spherical beads mainly consists of cellulose, lactose and other additives which are biodegradable and safe.Can be used for exfoliating and scrubbing properties in face & body wash, body and facial scrubs etc.	Water	0.5-3.0	Face Scrubs, Face Wash, Body Wash,Shower Gel, hand Sanitizer
InnoSpheres (Cellulose Beads (Dispersible)-customized colors)	Actives can be loaded in the beads based on customers requirement. The size and color can also be customized. It varies from 150 microns to 1.8 mm. Only natural and mineral color are used. No. organic dyes are used, biodegradable and safe. Can be used in gels, creams, hand sanitizers, shampoos, exfoliation, skin polishing agent.	Water	0.5-3.0	Face Scrubs, Face Wash, Body Wash,Shower Gel, hand Sanitizer
ANTI ACNE / SEBUM CONTROL				
Potassium Azeloyl Diglycinate	It is a new kind of Azelaic Acid derivative synthesized by Azelaic Acid and glycine. It has strong whitening capacity, good compatibility and sebum normalizing effect. It helps moisturizing and skin elasticity improvement. Inhibits secretion of sebum and remove acne. Whitens skin by competitively inhibiting the activity of tyrosinase. Enhances skin's ability to retain moisture, improves skin's elasticity.	Water	1.0-5.0	Creams, Lotions, Face Wash
A blend of Garcinia Mangostana Peel Extract/Magnolia Officinalis Bark Extract/Purnica Granatum Pericarp Extract	Antisebum GMP is a safe and brand-new anti-acne ingredient with combinative function: anti-sebum, anti-keratinization,anti-bacteria and anti-inflammation. Antisebum GMP is extracted from 3 classical vegetation skin: Magnolia officinalis, Punica granatum and Garcinia Mangostanacan. It solves acne problems caused by hyperkeratinization or excessive sebum secretion, inhibits p.acnes viability and relieves skin irritation arising by p.acnes.	Water	1.0-5.0	Lotion, Gel, Essence, Emulsion, Cream, Anti Acne Products, Anti Sebum Products.
SUNSCREENS / UV FILTERS				
Avobenzene	Broad spectrum UV-A filter ideal for application in personal care products, sun care, baby sun care, daily skin care and decorative cosmetics with sun protection.	Oil	1.0-5.0	Sunscreen Creams, lotions, Anti-ageing products, Skin Lightening Products
Benzophenone 3/ Oxybenzone	It is oil soluble powder for broad spectrum sunscreen active with maximal UV absorbance in the 320-400nm range Can be also used up to 0.5% as light stabilizer in cosmetic formulation.	Oil	1.0-5.0	
Benzophenone 4	It is a broad spectrum water-soluble UV-filter absorbing in both the UV-A and UV-B range, facilitating easy incorporation into a wide range of skin care, hair care and sunscreen products.	Water	1.0-5.0	
Micronized TiO2	Titanium Dioxide is Inorganic UV filter	Oil/Water	1.0-20.0	
Micronized ZnO	It is inorganics UV filter used in wide range of cosmetics & personal care products including makeup, nail products, baby lotions, bath soaps & foot powders. This is also used in skin protectants, such as diaper rash ointment & Sunscreen products.	Oil/Water	1.0-20.0	

SUNSCREENS/ UV FILTERS				
Octocrylene	An oil miscible UV-B absorber. Because it is hydrophobic and oil-soluble, it is preferred for water resistant and water repellent formulations. Also features excellent photo stability and it has the ability to stabilize Avobenzone.	Oil	1.0-5.0	Sunscreen Creams, lotions, Anti-ageing products, Skin Lightening Products
Octyl Methoxy Cinnamate/ Octinoxate	It is an effective oil soluble UV-B absorber with excellent dissolution properties. It has a relatively smooth emollient feeling & can be used in daily care and sunscreen products.	Oil	1.0-10.0	
Octyl Salicylate	It is an oil soluble UVB absorber, used in combination with other UV absorber to boost the SPF. It is an ideal for use in sun care and skin care products for daily protection & an exceptional addition to protective hair-care and lip-care products.	Oil	1.0-5.0	
PRESERVATIVES / ANTI-OXIDANTS				
Imidazolidinyl Urea	A stable compound with broad spectrum of antimicrobial activity, no sensitization of the skin, non-toxic.	Water	0.2-2.0	Skin Care, Hair Care, Sunscreens,Personal Care
DMDMH and Iodopropyl Butyl carbamate (IPBC)	Preservative in the water based cosmetic products against Gram +ve & Gram-ve bacteria. Is effective over a wide pH of 3 to 8.5	Water	0.3-1.0	
Ascorbyl Palmitate	Food grade synthetic antioxidants used in Cosmetics, personal care and fat containing foods.	Oil	0.1-5.0	Cosmentics, personal care, Vegetable oils, color cosmetics like Lipsticks.
Vitamin E Acetate	Skin conditioning agent and an anti-oxidant	Oil	0.1-2.0	Creams, Lotions, Serums
Methylchloroisothiazolinone and Methylisothiazolinone (MI/CMII)	It is a highly efficient preservative system that provides board spectrum protection at low concentrations. It is compatible for use in most rinse-off formulations	Water	0.05-1.0	Shampoos, conditioners, shower gels,bubble baths, and hand soaps.
Cetyl Pyridinium Chloride (CPC)	A cationic quaternary ammonium antiseptic. Safe & cost-effective multifunctional antimicrobial with broad spectrum efficacy against gram-positive & gram-negative bacteria & fungi at very low dosage rates. Easy to handle, biodegradable, odorless, soluble, stable, formaldehyde free, non-corrosive, non-VOC, non-oxidizing compound with neutral pH. An excellent replacement for formaldehyde-donors, parabens, triclosan, triclocarban, benzethonium chloride, benzalkonium chloride, MIT etc.	Water	0.05-1.0	Oral care products like mouth wash, toothpaste. Personal care products like Deodorants, Toiletries, Facial wipes, etc.
DISINFECTANT/ ANTI-MICROBIAL AGENT				
Benzalkonium Chloride 50% (BKC)	It used as antiseptic in Bactine to safely treat childhood scrapes and cuts. It is used in advanced, next generation hand sanitizers. It is used in hygienic towelettes and wet wipes. It is used in cosmetics such as eye and nasal drops, as a preservative	Water & Lower Alcohol	0.5-1.0	Detergents, sanitizers, oil antiseptic topical and ocular produts
Chlorhexidine Gluconate 20% Solution IP	A disinfectant and antiseptic that is used for skin disinfection. Chlorhexidine kills by disrupting the cell membrane.Upon application in vitro, chlorhexidine can kill nearly 100% of Gram-positive and Gram-negative bacteria within 30 sec.	Water	0.2-2.0	Oral care products like mouth wash, toothpaste.
Centrimonium Chloride (CTAC)	It is a preservative and antistatic agent. It can also be used as an antiseptic and disinfectant.	Water	0.1-2.0	Conditioner, shampoo, styling products, hairspray, and other personal care products
SPECIALTY PRODUCTS				
Coolants (Aq, Oil, Alcohol, Powder)	Long lasting cooling sensations. Since it is Odorless, it will not interfere with fragrance in formulations. No / Low irritations, very mild. Very safe .It is food grade.	Water / Oil / Alcohol,Powder	0.1-2.0	Cleansers, Hair Oils, Cooling powders, Massage Oils, Pain relieving, Deodorants, Mouth wash, Toothpaste
Warming Agent (Vanillyl Butyl Ether)	It give warming sensation, enhances microcirculation. It is very safe, low irritation, givens long lasting sensation. It is food grade,GRASS.	Water / Oil	0.05-1.0	Warming cream, lotions. Sports products, Slimming, Mask, Spa,Cleansing, Pain relief, Hair growth, Anti hair loss, Personal Lubricants, Massage Cream / Oil
Climbazole	It is antifungal and anti-dandruff agent	Water	0.1-2.0	Creams, Shampoos, Conditioners

SILICONES				
Cyclopentasiloxane	It is an excellent base fluid for personal care products. It is a volatile carrier fluid with low surface tension and gives a non-tacky, non-greasy, soft feel, to the skin. It gives excellent spreadability and lubricity. It can be used effectively in hair care, Skin care, nail care and sun care products.	Oil	1.0- 50.0	Creams, Lotions, Hair Serums
Cyclopentasiloxane and Dimethiconol	It is a blend of high molecular weight Dimethiconol and Cyclopentasiloxane. It is a premium soft feel cosmetic fluid. It is useful in imparting soft skin feel in sun care, skin care and hair care products. It is also used in anti-perspirants, deodorants and shower gel products.	Oil	1.0- 50.0	Creams, Lotions, Hair Serums
Dimethicone 350	It is a methylated linear siloxane polymer stabilized with trimethyl siloxane end blocking units. It is clear, colourless lubricant used to create a smooth, non-greasy and non-tacky feel. It is smooth, non-greasy, water repellant lubricant.	Oil	1.0- 10.0	Creams, Lotions, Hair Serums
PEG 12 - Dimethicone	It is a silicone polyether co-polymer surfactant used extensively in hair care products, skin care products and shaving lotions. It can form stable foam at low dosages while also giving a soft feel to skin. It is both water and alcohol compatible. It gives soft, silky feel to hair and skin. Forms a stable foam. Low surface tension and good wetting agents.	Water	1.0- 10.0	Face Wash, Shampoos, Shower Gel, Body Wash
Phenyl Trimethicone	They are perfect emollients with non-oily feeling and good compatibility with cosmetic ingredients. Widely used in skin and hair care products, such as body cream and lotion, sunscreen product, make-up products, deodorant, antiperspirant, hair conditioner. It has high refractive index and high gloss. The density is above 1.0. It is usually used in color cosmetic ,skin care and hair care products especially in crystal toner.	Alcohol/ Ethanol	0.2-5.0	Skin lotions and creams, suntan lotions and non-aerosol sprays, hair gloss agent in non-aerosol hair sprays, conditioners and grooming aids.
Amodimethicone and Trideceth-10 and Cetrimonium Chloride	It is a 35 percent cationic emulsion of an aminefunctional silicone polymer. The amodimethicone active is delivered in an opaque, low viscosity liquid with a neutral pH. It contains a non-tallow derived quaternary-amine surfactant and a biodegradable non-ionic surfactant. This emulsion enhances the conditioning performance of shampoos, conditioners and styling aids. The product provides easy formulation and good dilution stability.	Water	0.2-6.0	Shampoos, conditioners, styling aids, Conditioning agent
Cyclopentasiloxane and Phenyl Trimethicone and Dimethiconol and C12-15 Alkyl Benzoate and Dimethicone Crosspolymer	This Fluid is a silicone fluid blend that is clear, colorless, non-greasy and non-oily. It can provide a soft, smooth, silky feel and conditioning effect for the hair. In skin care applications, it can provide detackification in emollients & moisturizers and a light and excellent feel. Main applications are leave-on conditioners, hair sprays/liquids and skin care applications such as creams and lotions.	Oil	5.0- 10.0	Silky hair serum/liquid, leave-on conditioner applications, Used in skin, color cosmetic, antiperspirant/deodorant and shower applications
Dimethicone and Laureth-4 and Laureth-23	It is a non-ionic emulsion of a high molecular weight polydimethyl-siloxane	Water	2.0-5.0	A variety of hair care applications where the benefits of a high viscosity dimethicone are desired
Simethicone 30% Emulsion USP	It is a water-dilutable, non-ionic emulsion containing 30% Simethicone USP by weight	Water	0.5-1.5	Foam control in Color cosmetic, medical and pharmaceutical applications

BELOW PRODUCTS INFORMATION AVAILABLE ON REQUEST

Dimethicone	Dimethicone BP
Dimethicone & Dimethiconol	LK 1453
Cetyl Methicone	LK-7716
Amodimethicone Oil	LK ASF 7
Amodimethicone (and) C12-14 sec-Pareth-7	LK EMR 305
Cyclotetrasiloxane and Dimethiconol	LK 1441
